## PROFILE

I am a young individual seeking to launch out into the deep as on my journey to success the aim is to revolutionize technology in the global economy. With a passion I began to pursue a Bachelors of Science degree in Computer Science where I have gained a great deal of knowledge, not only in computing or the IT sector but also as a graphic designer. With five (5) years experience in graphic design I have gained the competence to continue on the path to be one of the best graphic designers in the region, and possibly the world.

## EXPERIENCE

### Enterprise Asset Management Data Admin

*Jamaica Public Service | January 2017 - Present*

Plans, develops, manages and coordinates a major asset management program for the Transmission and Distribution Department aimed at optimizing the life-cycle cost of the department's physical assets

#### Accomplishments:

*Within 6 months, played an integral role in launching the enterprise asset management software island-wide on desktop and mobile for the company's asset maintenance.*

### Geographical Information Systems Technician

*Jamaica Public Service | July 2016 - December 2016*

Created maps and customized geographic information system for web based systems and manipulated geographical data with python to serve a variety of purposes.

#### Accomplishments:

*Developed an application for internal customers to get details about all our external customers and asset location using leafletjs as the main javascript library.*

### Graphic Designer

*Mona Information Technology Services | Sept 2015 - June 2016*  
*Freelance | July 2013- Present*

Created multiple types of designs for web and promotional purposes for the different faculties within the University of the West Indies Mona Campus.

### Web/Android Front End Development

*Freelance | Sept 2015 - Present*

Develop web and android front end applications
